Re: Chemical Recovery Systems, Inc.

Dear Mr. Phelus:

Subsequent to our telephone conversation on April 22, 1980, representatives of the United States EPA and the NIOSH group visited Chemical Recovery Systems, Inc. on April 23, 1980. These people met with Mr. Freeman and myself and were afforded the opportunity to inspect the premises at will, take any samples they wished and evaluate the employee environment in any way they wished.

On completion of the evaluation of samples taken by members of your staff I would appreciate your providing me with copies of all test data and investigative reports made as well as an indication of the location at which test samples were taken. I also request that you provide the same information as to the investigation being done by NIOSH employees.

During our telephone conversation you indicated some concern as to the possible existence of PCBs on Chemical Recovery premises. I would appreciate your immediately providing me with a copy of any investigative report and test data showing the existence of PCBs or similar materials as well as the location and date that the test sample was taken.

Copies of the foregoing information should also be sent to Mr. Joseph Heimbuch of the Michigan Office of Chemical Recovery Systems, Inc. located at 36345 Van Born Road, Romulus, Michigan 48174.

Very truly yours,

David C. Long
